

Fabian Heng

Software Engineer, Full-Stack & DevOps

fabianheng.me · fabianheng@gmail.com · github.com/FabianHeng · in/fabianheng

Education

National University of Singapore --- Computer Science

08/23 – 06/26

Bachelor of Computing (Computer Science) with Distinction, GPA 4.56/5.

Singapore Polytechnic --- Infocomm Security Management

04/18 – 03/21

Diploma with Distinction, GPA 3.888/4. SP's CCA Gold with Honours.

Experience

Software Engineer --- Pick Network Pte. Ltd. (IMDA subsidiary)

06/26 – 01/27

• Internship

Leading the in-house rebuild of the company CMS/CRM on Payload CMS and PostgreSQL, replacing an external agency-managed platform to cut vendor costs and keep auth and customer data in-house. Migrating picknetwork.com and lockeralliance.net onto it.

Built the CI/CD pipeline from scratch on GitHub Actions (dependency checks, ESLint, Prettier, approval-gated merges, branch protection), and designed UAT and production workflows to ship Docker images to AWS ECR/ECS via GitHub OIDC.

Maintained an Express.js microservice tracking portal for 1,000+ smart lockers nationwide, reconciling data across MySQL, PostgreSQL and SQL Server to verify status tallies.

Freelance Developer --- Appsol Technologies LLP

01/26 – Present

• Part-Time

Take on client web projects through a small studio set up in 2026, including a privacy-first Singapore financial calculator for an AIA partnership that models CPF LIFE, housing affordability and IRAS tax reliefs.

Full Stack Software Engineer --- Ultraflow Engineering Pte. Ltd.

08/24 – 06/26

• Part-Time

Built a full-stack ERP from scratch for an SME engineering firm with Next.js, TypeScript and Tailwind CSS: 13 domain modules and 50k+ lines covering clients, quotations, invoices, DOs and POs, effectively doubling admin efficiency.

Secured the Supabase/PostgreSQL backend with Row-Level Security on every table and RBAC across 50+ migrations, and shipped an AI-assisted quoting tool with Vitest and Playwright CI.

Data Operations Engineer --- Healthway Medical Group

04/24 – 08/24

• Internship

Managed PDPA-sensitive patient records and queried MySQL to flag seniors at risk of severe vaccine reactions. Configured HTTP webhooks to link data management and registration systems.

Frontend Software Engineer --- Trustwave Singtel

03/20 – 08/20

• Internship

Designed a Web Threat Dashboard in Figma and built its reusable React components, feeding live MongoDB threat data into custom widgets.

Certifications

NUS Orbital - Apollo 11 (Advanced) --- NUS

Issued on 08/24

Singtel Cyber Cadet Scholarship 2019 --- Singtel

Issued on 03/20

Organizational Systems Security Analyst --- ThinkSecure

Issued on 09/19

Projects

PeerPrep --- Software Engineering Principles [\[link\]](#)

01/26 – 05/26

• National University of Singapore

Interview-prep platform on microservices (TypeScript, Express, React, Redis, Firebase) with JWT auth and RBAC, containerised with Docker and deployed to AWS ECS and Lambda via Terraform.

ClientNest --- Software Engineering [\[link\]](#)

02/25 – 05/25

• National University of Singapore

JavaFX desktop CRM for financial advisors built on strict MVC, with a CI pipeline enforcing a 60% test coverage threshold.

Toolbox

Languages: TypeScript, JavaScript, Python, Java, SQL, HTML/CSS

Frameworks: React, Next.js, Node.js, Express, Payload CMS, Tailwind CSS, Expo

Cloud & DevOps: AWS (ECR, ECS, Lambda), Docker, Terraform, GitHub Actions, Render

Data: PostgreSQL, MySQL, Supabase, Firebase, MongoDB, Redis

Tooling: Git, Vitest, Playwright, Figma

Yours truly,
