Education

National University of Singapore --- Computer Science

08/23 – 05/26

NUS Computer Science Student, GPA 4.56/5. Distinction.

Singapore Polytechnic --- Infocomm Security Management

04/18 – 03/21

Graduated with Distinction, GPA 3.888/4. SP's CCA Gold with Honors.

Experience

Software Engineer --- Pick Network

06/24 – 01/27

• Internship

Engineered an automated CI/CD pipeline from scratch utilising GitHub Actions and GitHub OIDC to automatically build and push and deploy Docker containerised applications to AWS.

Maintained and enhanced an internal tracking portal built on an Express.js microservice architecture, monitoring over 1,000 smart lockers nationwide by reconciling data across multiple relational database environments (MySQL, PostgreSQL, SQL Server) to verify status tallies.

Full Stack Software Developer --- Ultraflow Engineering

08/23 – 06/26

• Part-Time

Engineered a full-stack ERP platform from scratch for a SME engineering firm using Next.js, Node.js, TypeScript and Tailwind CSS, creating a monolithic domain modules service system to manage company records, client data, quotations, invoices, DOs, and POs.

Built a highly secure backend utilising Supabase and PostgreSQL and AI-assisted quoting tool to accelerate quote generation.

Data Operations Engineer --- Healthway Medical Group

04/24 – 08/24

• Internship

Manage sensitive data across centralized databases and Excel sheets. Streamlined operational workflows by configuring HTTP webhooks to integrate data management and registration systems

Telco Software Engineer --- Trustwave Singtel

03/20 – 08/20

• Internship

Developed and optimized reusable Web Threat Dashboard components using React, ensuring efficient and scalable front-end solutions. Processed and analysed large-scale datasets to extract meaningful insights.

Certifications

NUS Orbital - Apollo 11 (Advanced) --- NUS

Issued on 08/24

Singtel Cyber Cadet Scholarship 2019 --- Singtel

Issued on 03/20

Organizational Systems Security Analyst --- ThinkSecure

Issued on 09/19

Projects

PeerPrep --- Software Engineering Principles [\[link\]](#)

01/26 – 05/26

• National University of Singapore

Engineered a scalable interview-prep platform using a microservices architecture with RESTful APIs, CRUD operations, Redis, Firebase NoSQL, and JWT-based authentication with role-based access control (RBAC).

ClientNest --- Software Engineering [\[link\]](#)

02/25 – 05/25

• National University of Singapore

Built a JavaFX desktop CRM application for admins featuring modular architecture, streamlined contact management, appointment tracking, and an intuitive UI/UX, developed collaboratively following SE best practices.

Services

Full-Stack Development, UI/UX Web Design, Software Development, Database Management, Visual Design, Data Analysis, Customer Relations.

Toolbox

React, Figma, HTML/CSS, NextJS, TypeScript, Python, Docker, Redis, MongoDB, MySQL, Supabase, Firebase, Git, Java, Expo, MERN, REST, AWS.

Yours truly,
